

## Memoriu tehnic

**1. Adresa imobil:** extravilanul Mun. Dej, jud. Cluj Drum Judetean 161C, km 16+379-km 17+718

**2. Tipul lucrării :** Prima inregistrare imobil.

**3. Situația din teren:** limitele imobilului au fost indicate de către proprietar în vederea efectuării măsurătorilor necesare întocmirii documentației de prima înregistrare, punându-se la dispoziție actele de proprietate. Imobilul pentru care s-a întocmit prezenta documentație este situat în extravilanul Mun. Dej, jud. Cluj are o suprafață de 17502mp, o lungime de 1339ml, este neîmprejmuit, iar acolo unde există limite fizice, acestea sunt reprezentate santuri, drumuri laterale, linia pomilor, etc. Limitele imobilului au fost stabilite ținând cont de detaliile enumerate anterior, iar acolo unde acestea nu există s-au studiat planurile cadastrale și registrul parcelar cu numere topografice. De asemenea s-a urmărit ca limitele zonei drumului să fie stabilite în conformitate cu prevederile OG 43/1997, art.2 alin. 3 și 4, unde sunt precizate elementele care fac parte integrantă din drum, art. 14-17, unde sunt prevăzute suprafețele de teren aferente drumurilor publice, anexa 1 la OG 43/1997 privind regimul drumurilor, republicată și actualizată, unde sunt stabilite zonele de siguranță și de protecție ale drumurilor și ale podurilor.

**4. Operațiuni topo cadastrale efectuate:**

**A) Metode și aparatură folosite :** Pentru realizarea planului de amplasament și delimitare la scara 1:1000, integrarea în sistemul de proiecție STEREOGRAFIC 1970, a fost realizată prin metoda măsurătorilor GNSS, utilizându-se stațiile de referință CLUJ (CLUJ) și HUEDIN (HUED).

Metoda de lucru folosită este drumuire sprijinită la capete. Punctele de sprijin au fost determinate cu ajutorul tehnologiei GNSS utilizându-se metoda măsurătorilor statice, materializate prin buloane de fier. Pentru aceasta s-au folosit un număr de 2 receptoare GPS Trimble R4.

Procesarea măsurătorilor s-a realizat cu softul GNSS Solutions.

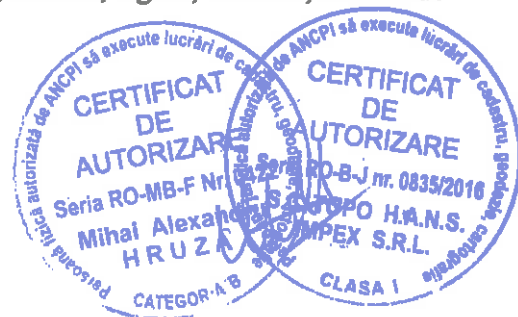

Coordonatele punctelor de sprijin au fost obținute în sistem de coordonate ETRS 89. Coordonatele în sistemul național STEREOGRAFIC 1970 au fost obținute utilizând aplicația pusă la dispoziție de către ANCPI – TransDatRO versiunea 4.04.

Rapoartele au fost tipărite cu ajutorul softului de procesare și conțin date despre măsurătorile în punctele de sprijin, procesarea vectorilor, compensarea rețelei, schița rețelei și inventarul punctelor în ETRS 89 și STEREOGRAFIC 1970. Pentru ridicarea topografică a detaliilor planimetrice și altimetrice s-au efectuat măsurători clasice, folosind stația totală Leica TS06 Plus, plecând de pe punctele determinate GPS anterior, prin metoda radierii. În funcție de configurația terenului și a detaliilor existente s-au folosit puncte de stații radiate doar în măsura în care precizia impusă de norme nu a fost afectată. Prelucrarea datelor s-a făcut folosindu-ne de programul Toposys. În zonele unde a fost posibil, radierea punctelor a fost făcută cu 2 receptoare GPS Trimble R4, prin metoda RTK, folosind serviciul național ROMPOS.

În conformitate cu prevederile OG 43/1997 au fost măsurate următoarele elemente identificate în zona de interes:

- profile transversale ale strazii, între garduri, prin minim 4 puncte (gard stanga, margine drum stanga, margine drum dreapta, gard dreapta) ;
- limitele de proprietate ;
- elementele constructive ale drumului : parte carosabila, trotuare, santuri, rigole, taluzuri, santuri de garda, ziduri de sprijin și alte lucrări de artă ;

- locuri de parcare, oprire și staționare;
- poduri, podete;
- construcții de apărare, protecție și consolidare ;
- dispozitive de scurgere a apelor;

- drumuri laterale, prin intoarcerea gardurilor in lungul drumului lateral si alte elemente (ex: margini drum, trotuare, santuri), drumurile de exploatare, drumurile tehnologice;
- intersecțiile au fost materializate prin ridicarea gardurilor pentru fiecare colt al intersecției si ridicarea celorlalte elemente (margini drum, trotuare, santuri) ;
- rețele existente, cu specificarea categoriei prin semne conventionale,
- pomi;
- piciorul si marginea de sus a taluzurilor in zonele de rambleu si debleu.

B) Sistem de coordonate : Sistem național de proiectie Stereografic 1970-planimetric

Data intocmirii : Octombrie 2019

Semnatura si stampila
